4. Capital adequacy

SpareBank 1 SMN utilises the Internal Rating Based Approach (IRB) for credit risk. Use of IRB imposes wide-ranging requirements on the bank's organisational set-up, competence, risk models and risk management systems. As from 31 March 2015 the bank has received permission to apply the Advanced IRB Approach to those corporate portfolios that were previously reported under the Basic Indicator Approach.

As of 31 December 2016 the capital conservation buffer requirement is 2.5 per cent, the systemic risk requirement is 3.0 per cent and the Norwegian countercyclical buffer is 1.5 per cent. These requirements are additional to the requirement of 4.5 per cent CET1 capital, so that the overall minimum requirement on CET1 capital is 11.5 per cent. In addition the financial supervisory authority has set a Pillar 2 requirement of 2.1 per cent for SpareBank 1 SMN, effective as from the fourth quarter of 2016. The total minimum requirement on CET1 capital is accordingly 13.6 per cent.

The countercyclical buffer increased to 1.5 per cent from 1.0 per cent with effect from 30 June 2016. The Ministry of Finance has decided to increase the buffer by 0.5 per cent to 2.0 per cent with effect from 31 December 2017.

As from the fourth quarter of 2016 differentiated rates came into force for the countercyclical buffer. For exposures in other countries the countercyclical buffer rate set by the authorities in the country concerned is applied. If that country has not set a rate, the same rate as for exposures in Norway is applied unless the Ministry of Finance sets another rate. For the fourth quarter of 2016 the parent bank is below the capital deduction threshold such that the Norwegian rate is applied to all relevant exposures. For groups, the risk-weighted countercyclical capital buffer is 1.5 per cent.

Parts of the group's hybrid capital and subordinated debt were issued under earlier rules. This will be subject to a write-down of 40 per cent in 2016 and thereafter 10 per cent per year. As at 31 December 2016 the bank held hybrid capital worth NOK 450 million subject to write-down. For subordinated debt the figure NOK 661 million. The financial supervisory authority may require the hybrid capital to be written down in proportion to equity capital if the bank's CET1 capital ratio falls below 5.125 per cent.

7. Segment Information

For the subsidiaries, the figures refer to the respective company accounts, while for joint ventures incorporated by the equity method the Group's profit share is stated, after tax, as well as book value of the investment at group level.

The segment SB1 Markets comprises the subsidiary SpareBank 1 Markets as from the second quarter of 2015. SpareBank 1 Markets became a subsidiary on 1 April 2015 when SpareBank 1 SMN integrated its markets activity into SpareBank 1 Markets and at the same time increased its holding to 73.3 per cent. The stake was increased to 73.5 per cent in fourth quarter 2015 as a result of a stock issue.

In the reporting of the first quarter of 2015 and previously, the segment Markets comprised SpareBank 1 SMN's own markets activity in the parent bank. The result for the first quarter of 2015 is from the second quarter moved to the column "Uncollated".

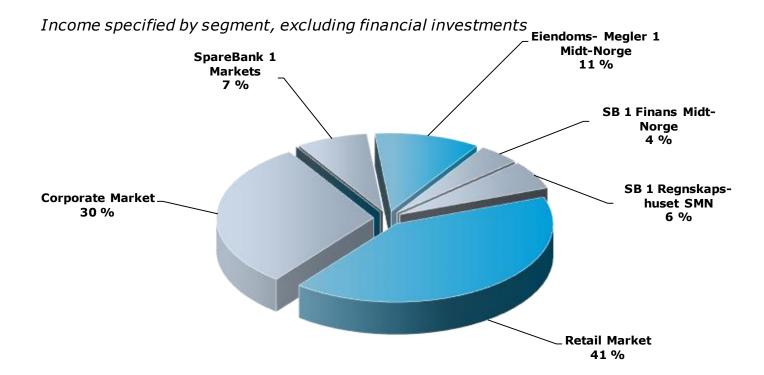

The Group has changed its presentation of accrued interest as from the first quarter of 2015. Accrued interest is now presented together with the underlying financial instrument. It was previously presented as other assets and other liabilities. Historical figures for 2014 are similarly restated.
